

## NEUTRA LIQUID

Lactic acid buffer enriched with vitamins

- Conceived to counteract the onset of lactic acid in sport horses.
- Particularly recommended in cereal-based diets, in which the great amount of starch to digest causes excessive intestinal acidity.
- Vitamin B1, contained in very high levels in Neutra Liquid, increases carbohydrate degradation, improves heart function and preserves proper peristalsis in the digestive system.

### DESCRIPTION

Neutra Liquid is the liquid complementary feed conceived to reduce lactic acid formation and facilitate its removal from muscles. The product is a sodium citrates blend enriched with important B-group vitamins and betain (trimethylglycine). If administered daily in a horse's diet, Neutra Liquid is a valuable ally in reducing lactic acid's negative effects, ensuring long-lasting, constant results.

### COMPOSITION

**Composition:** Demineralised osmotized water; Sodium salts of organic acids (sodium citrates); Potassium salts of organic acids (potassium sorbate); Sorbitol; Sucrose.

**Analytical constituents (in % on product as is):** Moisture 70; Crude protein 1.3; Crude ash 8.5; Crude fibre 0; Crude fat 0; Sodium 4.

**Additives (all expressed in mg/ kg of product as is):** Vitamins and Provitamins: Vitamin B12 15. Vitamins, provitamins and chemically well defined substances having similar effect: 3a825i Vitamina B2 produced by Ashyba gossypii DSM23096 40; 3a925 Betaine Hcl 20,000; 3a820 Vitamin B1 4,000.

### DIRECTIONS FOR USE

Use 50-60 ml of Neutra Liquid per day, properly mixed with the daily ration. This amount corresponds to a little disposable coffee cup.

### Instructions for use

All horses

50-60 ml  
per day

### SIZE

- 1 l (bottle)
- 5 l (Bag in Box)
