

UNIKLAY

Kaolin and thermal clay for healthy limbs

- It does not contain alcohol and, therefore, can be used on wounds and abrasions.
- Uniklay is a valid ally in the resolution of ecchymosis and contusions.
- New formula: easier to spread, easier to wash off.

DESCRIPTION

Uniklay is the kaolin, menthol and zinc oxide-based antiphlogistic paste. Its formula includes pure kaolin for cosmetic use, sodium bentonite, glycerine, menthol crystals, zinc oxide, skin protective agents and Aloe vera extract.

COMPOSITION

Constituents: Sodium bentonite; Kaolin; Demineralised osmotized water; Zinc oxide; Glycerin; Menthol crystals; Aloe vera Glycolic extract.

DIRECTIONS FOR USE

Spread a thin layer of Uniklay directly on limbs. It is suggested to let Uniklay evaporate a little before bandaging with wet paper or bandages. Uniklay can be used on excoriated and/or abraded skin.

SIZE

- 4 kg (bucket)
- 10 kg (bucket without)
